Cartography & Map Interpretation - with Ian Turner (ULA Spring Course)

The first half of the course will focus on how effective maps are created—how text, colors, symbols, projections, scale, audience, and psychology—are all important factors to building maps that accurately convey the author's message to the reader. Students will prepare progressively more complex maps each week during this part of the course as a part of their homework. The second half of the course will focus on how to find clues on maps that provide evidence of the history, culture, and industry of a given area. Students will begin their research studying maps of Lancaster County and Pennsylvania and then apply that knowledge to areas they are likely unfamiliar with.

This 15 week, half credit course, will meet for 1 hour/week and is for 9th – 12th graders.

Course Supplies: Students will need a set of color pencils. A copy fee is included in the cost of the course.

Course fee: \$75
