

Fundamentals of Anatomy & Physiology

Betsy Kreider and Leigh Ann Rohrer

Upper Level - Spring 2019

This course is an introduction to the terminology, anatomy, and physiology of the human body as it applies to everyday life. The students will be introduced to the structures and functions of the human body which will provide a basis for understanding how changes in structure and function can lead to injury and disease.

The books listed on the "course description" were chosen a year ago and we have since decided to create a student workbook with pages for notes and drawings. Each student will need to pay \$15-\$25 for the workbook – it is still being developed and once the copies are made, an exact cost will be given. The book will be available the first week of class.

1/9/19	Week 1: Introduction to Anatomy
1/16/19	Week 2: Histology
1/23/19	Week 3: Integumentary System
1/30/19	Week 4: Skeletal System
2/6/19	Week 5: Muscular System
2/13/19	Week 6: NO CLASS
2/20/19	Week 7: Digestive System
2/27/19	Week 8: Nervous System
3/6/19	Week 9: Respiratory System
3/13/19	Week 10: Circulatory System
3/20/19	SPRING BREAK OR SNOW MAKEUP
3/27/19	Week 11: Endocrine System
4/3/19	Week 12: Urinary System
4/10/19	Week 13: Lymphatic System
4/17/19	Week 14: Organ Trail presentation
4/24/19	Week 15: Final wrap-up
